Benefits of Purchasing

Page 8

Led by Steven G. Economos, the 360 Commercial Partners Office Advisory team is Orange County's #1 seller of office buildings. As such, they are the foremost experts in OC's office sector and are widely sought after by buyers, sellers, investors and the media for advice on a range of topics relating to the purchase, sale and leasing of office space and buildings in the region. Below is their recent analysis of the current OC office market and recommendations regarding the frequently posed question of whether the time is right to lease or purchase office space.

- Recommendation:** For stable businesses with strong balance sheets, the time is right to purchase office space.
- Value Pricing:** **Current office sale pricing is at levels last seen in the early 2000's.** This reflects a move to realistic, fundamentally sound pricing, effectively erasing the inflated sales prices of 2005-2008.
- Favorable Financing:** Historically low interest rates and government-sponsored SBA programs allow the purchase of a building for only 10% down.
- Inflation Protection:** Purchasing an office enables you to protect your business from potential runaway lease markets in the future.
- Portfolio Enhancement:** Add a building to your retirement nest egg. If your business is stable and needs office space, the rent from your business pays off the mortgage. Additional benefits include real estate appreciation and the tax advantages of depreciation.

Purchase vs Lease Illustration

Situation: Business owner purchases and occupies 4100 Birch for \$239/SF, with an initial investment of \$26/SF (10% down + est. closing costs).

Estimated Monthly Costs

Typical Operating Expenses:	\$0.65/SF	
Mortgage Payment:	\$1.47/SF	
Amount of Principal in Mortgage Payment*:	(\$0.29/SF)	*Note: This money is simply cash being converted to savings

Estimated Monthly Cost to Own Year 1: \$1.83/SF vs Estimated Starting Lease Rate: \$1.85/SF Full Service Gross

The advantage to owning increases each year. Assuming lease rates increase by 3% annually, operating expenses increase by 2.5% annually, and mortgage payments remain fixed, below is a 10-year comparative analysis of purchasing versus leasing (with all figures per square foot):

	Lease Rate	Ownership Cost	Annual Savings	Cumulative	
Year 1	\$1.85	\$1.83	\$0.26	\$0.26	
Year 2	\$1.91	\$1.81	\$1.09	\$1.35	
Year 3	\$1.96	\$1.80	\$1.93	\$3.28	
Year 4	\$2.02	\$1.79	\$2.78	\$6.06	
Year 5	\$2.08	\$1.78	\$3.65	\$9.72	
Year 6	\$2.14	\$1.77	\$4.54	\$14.26	
Year 7	\$2.21	\$1.76	\$5.45	\$19.70	
Year 8	\$2.28	\$1.74	\$6.37	\$26.07	Break Even
Year 9	\$2.34	\$1.73	\$7.31	\$33.38	
Year 10	\$2.41	\$1.72	\$8.27	\$41.65	10 Year Own vs. Lease Savings

Tax Benefits of Depreciation

Page 10

Assume a business owner or trust personally purchases 4100 Birch and leases it to his/her business at a market rate (this is allowable under the SBA program). Cash flow and taxable income of the business are not affected. However, this owner's personal financial situation would benefit from depreciation of the building. In terms of this scenario, depreciation is the spreading of cost over the useful life of an asset. The Internal Revenue Service allows for a tax deduction of commercial property improvements depreciation based on a 39 year life. Simply stated, a portion of the cost of the building (excluding land) reduces taxable income, and thus tax liability, for a period of up to 39 years.

In this scenario, let us assume the following facts:

Purchase Price:	\$2,390,000
Building Size:	10,000 Square Feet (\$239/SF)
Percentage of Building to Land:	45% / 55%
Owner's personal income tax bracket:	33%

The amount subject to depreciation, in this example, is 45% of \$2,390,000, or \$1,075,500. Spread over the IRS' mandated 39 years, the deduction per year is approximately \$28,000. **At a tax rate of 33%, the tax savings due to depreciation is \$9,000 per year of ownership.**

If you are considering this on a monthly per-square-foot basis consistent with the example on the previous page, this tax savings equates to an additional ownership benefit of \$0.08/sf per month.

As time progresses, the cost basis of the building is being reduced by depreciation accumulated since purchase. Should the owner decide to sell, the depreciation is recaptured and taxed, but it is at a standard 25% as opposed to the 33% ordinary income rate used when the deduction was realized. This yields an overall tax benefit during the building ownership period, especially if the building is kept and passed down to future generations.

It is important to note that this example may differ from your situation. Please consult with your tax advisor.
